

AWS Free Services

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Free services are free forever, unlike the “free-tier” that are up to a point of usage or time

IAM - Identity Access Management

Amazon VPC

Auto Scaling

CloudFormation

Elastic Beanstalk

Opsworks

Amplify

AppSync

CodeStar

Organizations & Consolidated Billing

AWS Cost Explorer

The AWS services are also free, however these AWS Services provision other services which may cost money

AWS Support Plans

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

Basic	Developer	Business	Enterprise
Email Support only For Billing and Account	Tech Support via Email ~24 hours until reply

Developer

*\$29 USD /month

or

3% of monthly AWS usage
whichever is greater

eg.

Monthly Spend is \$500

3% of 500 = \$15 USD (\$29)

Monthly Spend is \$1000

3% of 1000 = \$30 USD

Business

*\$100 USD / month

or

10% of monthly AWS usage for the first \$0-\$10K
7% of monthly AWS usage from \$10K-\$80K
5% of monthly AWS usage from \$80K-\$250K
3% of monthly AWS usage over \$250K
whichever is greater

eg.

Monthly Spend is \$1000

10% of 1000 = \$100 USD

Monthly Spend is \$5000

10% of 5000 = \$500 USD

Monthly Spend is \$12,000

10% of 10,000 = \$1000 USD

7% of 2,000 = 140 USD

\$1140 USD

Enterprise

*\$15,000 USD / month

or

10% of monthly AWS usage for the first \$0-\$150K
7% of monthly AWS usage from \$150K-\$500K
5% of monthly AWS usage from \$500K-\$1M
3% of monthly AWS usage over \$1M
whichever is greater

Technical Account Manager (TAM)

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

A Technical Account Manager? (TAM) provides both **proactive guidance** and **reactive support** to help you succeed with your AWS journey

What does a TAM do? (Straight from an AWS Job Posting)

- Build solutions, provide technical guidance and advocate for the customer
- Ensure AWS environments remain operationally healthy whilst reducing cost and complexity
- Develop trusting relationships with customers, understanding their business needs and technical challenges
- Using your technical acumen and customer obsession, you'll drive technical discussions regarding incidents, trade-offs, and risk management
- Consult with a range of partners from developers through to C-suite executives
- Collaborates with AWS Solutions Architects, Business Developers, Professional Services Consultants, and Sales Account Managers
- Proactively find opportunities for customers to gain additional value from AWS
- Provide detailed reviews of service disruptions, metrics, detailed prelaunch planning
- Being part of a wider Enterprise Support team providing post-sales, consultative expertise
- Solve a variety of problems across different customers as they migrate their workloads to the cloud
- Uplift customer capabilities by running workshops, brown bag sessions, etc.

TAMs follow the Amazon Leadership Principles
Especially about being Customer Obsessed!

TAMs are only available at the Enterprise Support tier.

AWS Marketplace

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Marketplace is a curated digital catalogue with thousands of software listings from independent software vendors.

Easily find, buy, test, and deploy software that already runs on AWS.

The product can be **free** to use or can have an **associated charge**. The charge becomes part of your AWS bill, and once you pay, AWS Marketplace pays the provider.

The sales channel for ISVs and Consulting Partners allows you to **sell your solutions** to other AWS customers.

Products can be offered as

- Amazon Machine Images (AMIs)
- AWS CloudFormation templates
- Software as a service (SaaS) offerings
- Web ACL
- AWS WAF rules

Consolidated Billing

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

Consolidated Billing is a feature of AWS Organizations that allows you to pay for multiple AWS accounts with **one bill**.

For billing AWS treats all the accounts in an organization as if they were one account.

You can designate one **master account** that pays the **charges** of all the other **member accounts**.

Consolidated billing is offered at no additional cost!

Use **Cost Explorer** to visualize usage for consolidated billing

You can combine the usage across all accounts in the organization to share the volume pricing discounts

 Member Account
Accounts that leave the organization can no longer access Cost Explorer data

Consolidated Billing – Volume Discounts

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS has **Volume Discounts** for many services

The more you use, the more you save.

Consolidated Billing lets you take advantage of Volume Discounts

Consolidate Billing is a feature of AWS Organizations

Data Transfer	
First 10 TB	\$0.17 per GB
Next 40 TB	\$0.13 per GB

$$\text{Odo} \quad (4 * 1024) * 0.17 = \$696.32 \quad 1 \text{ TB} = 1024 \text{ GB}$$

$$\text{Dax} \quad (8 * 1024) * 0.17 = \$1392.64$$

$$\text{Unconsolidated} \quad 696.32 + 1392.64 = \$2088.96$$

$$\text{Consolidated} \quad ((10 * 1024) * 0.17) + ((2 * 1024) * 0.13) = \$2007.04$$

AWS Trusted Advisor

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Trusted Advisor is a **recommendation tool** which automatically and actively monitors your AWS account to provide **actional recommendations** across a series of categories.

The screenshot shows the AWS Trusted Advisor dashboard. On the left, there's a sidebar with 'Trusted Advisor' at the top, followed by 'Dashboard', 'Cost optimization', 'Performance', 'Security', 'Fault tolerance', 'Service limits', and 'Preferences'. Below that is a 'Checklist' section with a green checkmark icon and the text 'AWS Trusted Advisor has checked 11 categories for you!'. Under 'Dashboard', there's a 'Checks summary' section with two items: 'Action recommended' (2) and 'Investigation recommended' (1). A red arrow points from the text above to the 'Action recommended' section. Another red arrow points from the text above to the 'Investigation recommended' section. To the right, a detailed view of the 'Investigation recommended' item is shown: 'Security Groups - Specific Ports Unrestricted' (Last updated: 3 minutes ago). It says 'Checks security groups for rules that allow unrestricted access (0.0.0.0/0) to specific ports.' and '51 of 146 security group rules allow unrestricted access to a specific port.'

Think of AWS Trusted Advisor like an automated checklist of best practices on AWS

The 5 categories of AWS Trusted Advisor

- Cost Optimization – How can we save money?
- Performance – How can improve performance?
- Security – How we can improve security?
- Fault Tolerance – How can we prevent a disaster or data loss?
- Service Limits – Are we going to hit the maximum limit for a service?

AWS Trusted Advisor

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Trusted Advisor provides different level of checks based on your AWS Support Plan

Basic

Developer

Business

Enterprise

7 Trusted Advisor Checks

All Trusted Advisor Checks

AWS providers the following checks for free:

1. MFA on Root Account
2. Security Groups – Specific Ports of Unrestricted
3. Amazon S3 Bucket Permissions
4. Amazon EBS Public Snapshots
5. Amazon RDS Public Snapshots
6. IAM Use - discourage the use of root access
7. Service Limits (All Service limits checks are free)

Six security checks

- RDS Read Replicas per Master
- RDS Reserved Instances
- RDS Subnet Groups
- RDS Subnets per Subnet Group
- RDS Total Storage Quota
- Route 53 Hosted Zones
- Route 53 Max Health Checks
- Route 53 Reusable Delegation Sets
- Route 53 Traffic Policies
- Route 53 Traffic Policy Instances
- SES Daily Sending Quota
- VPC**
- VPC Elastic IP Address
- VPC Internet Gateways

Service Level Agreements

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

What is a Service Level Agreement (SLA)?

A SLA is a **formal commitment** about the **expected level of service** between a customer and provider.

When a service level is not met and if Customer meets its obligations under the SLA, Customer will be eligible to receive the compensation eg. **Financial or Service Credits**

What is a Service Level Indicator (SLI)?

A **metric/measurement** that indicates what measure of performance a customer is receiving at a given time

A SLI metric could be uptime, performance, availability, throughput, latency, error rate, durability, correctness

What is a Service Level Objective (SLO)?

The objective that the provider has agreed to meet

SLOs are represented as a specific **target percentage** over a period of time.

Availability SLA of **99.99%** in a period of **3 months**

Target percentages

- 99.95%
- 99.99%
- 99.99999999% (commonly called **Nine nines**)
- 99.9999999999% (commonly called **Nine elevens**)

AWS Service Level Agreements

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

DynamoDB SLA

AWS will use commercially reasonable efforts to make DynamoDB available with a Monthly Uptime Percentage for each AWS region, during any monthly billing cycle, of (a) at least 99.999% if the Global Tables SLA applies, or (b) at least 99.99% if the Standard SLA applies

In the event DynamoDB does not meet the Service Commitment, you will be eligible to receive a Service Credit as described below

	Monthly Uptime Percentage	Service Credit Percentage
<i>Global Tables SLA</i>	Less than 99.999% but equal to or greater than 99.0%	10%
	Less than 99.0% but equal to or greater than 95.0%	25%
	Less than 95.0%	100%
<i>Standard SLA</i>	Less than 99.99% but equal to or greater than 99.0%	10%
	Less than 99.0% but equal to or greater than 95.0%	25%
	Less than 95.0%	100%

AWS Service Level Agreements

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

Compute SLAs

- Amazon Elastic Compute Cloud (Amazon EC2)*
- Amazon Elastic Block Store (Amazon EBS)
- Amazon Elastic Container Service (Amazon ECS)
- AWS Fargate for Amazon ECS and Amazon EKS

AWS makes two SLA commitments for the Included Services:

1. a Region-Level SLA that governs Included Services deployed across multiple AZs or regions, and
2. an Instance-Level SLA that governs Amazon EC2 instances individually.

	Monthly Uptime Percentage	Service Credit Percentage
<i>Region-Level SLA</i>	Less than 99.99% but equal to or greater than 99.0%	10%
	Less than 99.0% but equal to or greater than 95.0%	30%
	Less than 95.0%	100%
<i>Instance-Level SLA</i>	Less than 99.5% but equal to or greater than 99.0%	10%
	Less than 99.0% but equal to or greater than 95.0%	30%
	Less than 95.0%	100%

AWS Service Level Agreements

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

RDS SLA

AWS will use commercially reasonable efforts to make Multi-AZ instances available with a Monthly Uptime Percentage of at least 99.95% during any monthly billing cycle

In the event Amazon RDS does not meet the Monthly Uptime Percentage commitment, you will be eligible to receive a Service Credit as described below.

Monthly Uptime Percentage	Service Credit Percentage
Less than 99.95% but equal to or greater than 99.0%	10%
Less than 99.0% but equal to or greater than 95.0%	25%
Less than 95.0%	100%

Service Health Dashboard

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

The Service Health Dashboard shows the general status of AWS services,

The screenshot shows the AWS Service Health Dashboard. At the top, there's a navigation bar with the AWS logo and a "SERVICE HEALTH DASHBOARD" button. Below it, a breadcrumb trail says "Amazon Web Services > Service Health Dashboard". A call-to-action button "Open the Personal Health Dashboard" is highlighted with a red box and arrow. The main section is titled "Current Status - Oct 19, 2021 PDT". It contains a message from AWS about publishing service availability information and encourages users to report issues. Below this is a table with tabs for different regions: North America (selected), South America, Europe, Africa, Asia Pacific, and Middle East. The "Contact Us" tab is also present. The "Recent Events" section shows "No recent events". The "Remaining Services" section lists three services: Alexa for Business (N. Virginia) operating normally, Amazon API Gateway (Montreal) operating normally, and Amazon API Gateway (N. California) operating normally. Each service row has a "Details" link and an "RSS" link. A red arrow points from the text "An icon and details will indicate the status of each AWS Service" to the "Details" link under the first service entry.

North America	South America	Europe	Africa	Asia Pacific	Middle East	Contact Us
Recent Events No recent events.	Details	RSS				
Remaining Services  Alexa for Business (N. Virginia)	Details	RSS				
 Amazon API Gateway (Montreal)	Details					
 Amazon API Gateway (N. California)	Details					

An **icon** and **details** will indicate the status of each AWS Service

AWS Personal Health Dashboard

Cheat sheets, Practice Exams and Flash cards [👉 www.exampro.co/clf-c01](https://www.exampro.co/clf-c01)

AWS Personal Health Dashboard provides **alerts and guidance** for AWS events that might affect your environment.

All AWS customers can access the Personal Health Dashboard.

The Personal Health Dashboard shows recent events to help you manage active events, and shows proactive notifications so that you can plan for scheduled activities

Use these alerts to get notified about changes that can affect your AWS resources, and then follow the guidance to diagnose and resolve issues.

The screenshot shows the AWS Personal Health Dashboard interface. At the top, there's an overview section with three metrics: 0 Open issues (Past 7 days), 1 Scheduled changes (Upcoming and past 7 days), and 1 Other notifications (Past 7 days). A red arrow points from the text "All AWS customers can access the Personal Health Dashboard." to the "Scheduled changes" metric. Below this is a navigation bar with tabs: Open issues, Scheduled changes (which is selected), and Other notifications. The main content area displays a "Scheduled changes (1)" section with a "View event log" button. It lists an event: "EC2 persistent instance retirement scheduled". The event details show it's an "Upcoming" event in the "us-east-1" region, associated with instance "i-04444-1" and resource "Scheduled change". The event data table includes columns for Event, Start time, Status, End time, Region / Availability Zone, and Affected resources. The description section notes that EC2 has detected degradation of the underlying hardware hosting the instance. The "What will happen to my instance?" section states that the instance will be stopped after the specified retirement date, with a note that local instance-store volumes will be lost if the instance is stopped or terminated.

AWS Abuse

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Trust & Safety is a team that specifically deals with abuses occurring on the AWS platform for the following issues:

Spam

You are receiving unwanted emails from an AWS-owned IP address, or AWS resources are used to spam websites or forums.

Port scanning

Your logs show that one or more AWS-owned IP addresses are sending packets to multiple ports on your server. You also believe this is an attempt to discover unsecured ports.

Denial-of-service (DoS) attacks

Your logs show that one or more AWS-owned IP addresses are used to flood ports on your resources with packets. You also believe that this is an attempt to overwhelm or crash your server or the software running on your server.

Intrusion attempts:

Your logs show that one or more AWS-owned IP addresses are used to attempt to log in to your resources.

Hosting prohibited content:

You have evidence that AWS resources are used to host or distribute prohibited content, such as illegal content or copyrighted content without the consent of the copyright holder.

Distributing malware

You have evidence that AWS resources are used to distribute software that was knowingly created to compromise or cause harm to computers or machines that it's installed on.

AWS Support does not deal with Abuse tickets. You need to contact
abuse@amazonaws.com or fill out the Report Amazon AWS abuse form.

AWS Free-Tier

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

- AWS has a free-tier which allows you to use AWS at no cost
- for the first 12 months of signup
 - Or free usage up to a certain monthly limit forever

EC2 Web Server

t2.micro 750 hours per month for 1 year

RDS Database (MySQL or Postgres)

t2.db.micro 750 hours per month for 1 year

ELB Load Balancer

750 hours per month for 1 year

The Best Deals

Amazon CloudFront Homepage Video

50 GB data-transfer out in total for 1 year

Amazon Connect Toll Free Number

90 minutes of call-time per month for 1 year

Amazon ElastiCache Caching

cache.t3.micro 750 hours per month for 1 year

Amazon ElasticSearch Service Full Text Search

750 hours per month for 1 year

PinPoint Campaign / Marketing Emails

5,000 targeted users per month for 1 year

SES Emails sent by your web-application

62,000 emails per month forever

AWS CodePipeline CI/CD

1 Pipeline free

AWS CodeBuild Building Code

100 build minutes per month forever

AWS Lambda Serverless Compute

1M free request per month

3.2M seconds of compute time per month

AWS Credits

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Promotional Credits (or AWS Credits for short) are the equivalent to USD dollars on the AWS platform. AWS Credits can be earned several ways:

- Joining the AWS Activate startup program
- Winning Hackathons
- Participating in Surveys
- ...

AWS Credits generally have an expiry date attached to them.

AWS Credits can be used for most services but there are exceptions where AWS Credits cannot be used eg. Purchasing a domain via Route53

AWS Partner Network (APN)

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

partner
network

The AWS Partner Network (APN) is a global partner program for AWS. Joining the APN will open your organization up to business opportunities and allows exclusives trainings and marketing events

When joining the APN you can either be a:

Consulting Partner – you help companies utilize AWS

Technology Partner – you build technology ontop of AWS as a service offering

- A partner belongs to a specific Tier: Select, Advanced or Premier
- Different tiers have different Annual fee commitments
- Different tiers have different Knowledge requirements
 - AWS Certification
 - AWS APN-Exclusive Certifications
- You can get back Promotional AWS Credits
- You can have unique speaking opportunities in the official AWS marketing channels. Eg blogs, webinars
- Being part of the APN is a requirement to be a Sponsor with a vendor booth at AWS Events

AWS Budgets

Cheat sheets, Practice Exams and Flash cards www.exampro.co/clf-c01

AWS Budgets give you the ability to setup alerts if you **exceed** or are **approaching** your defined budget

Create Cost, Usage or Reservation Budgets

It can be tracked at the **monthly, quarterly, or yearly levels**, with customizable start and end dates

Alerts support **EC2, RDS, Redshift, and ElastiCache** reservations.

AWS Budgets can be used to Forecast costs but is limited compared to Cost Explorer or doing your analysis with AWS Cost and Usage Reports along with a Business Intelligence tool

Budget based on a fixed cost or plan your upfront based on your chosen level
Can be easily managed from the **AWS Budgets** dashboard or via the **Budgets API**.
Get Notified by providing an email or **Chatbot** and threshold how close to the current or forecasted budget

Choose your budget amount in \$\$\$

Budgeted amount

\$100

Last month's cost \$126.59

Usage unit(s)

Usage Type Group

EC2: Running Hours (Hrs) X

Usage Type

Choose based a different kind of unit

Budgeted amount

100

Hrs

Last month's usage 2260.54 Hrs

AWS Budgets

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

You have a list of budgets:

Budgets (3) <small>info</small>						
<input type="checkbox"/>	Name	Thresholds	Budget	Amount used	Forecasted am...	Current vs. budgeted
<input type="checkbox"/>	AWS Credits Budgets	 Exceeded [1]	\$200.00	\$318.79	\$392.07	-159.39% -196.40
<input type="checkbox"/>	MinecraftServerBudget	 OK	\$100.00	\$0.00	-	0.00% -
<input type="checkbox"/>	Overall Costs	 Exceeded [1]	\$100.00	\$393.77	\$393.20	-193.77% -59.28

You can see your budget history, download it as a CSV

- first two budgets are **free** of charge
- Each budget is **\$0.02** per day **~0.60 USD / month**
- **20,000** budgets limit

AWS Budget Reports

Cheat sheets, Practice Exams and Flash cards www.exampro.co/clf-c01

AWS Budget Report is used alongside AWS Budgets to create and send daily, weekly, or monthly reports to monitor the performance of your AWS Budget that will be emailed to specific emails.

The screenshot shows the 'Reports' page in the AWS Management Console. At the top, there is a header with the title 'Reports' and a 'Info' link. Below the header, there is a search bar with the placeholder 'Find a budget report' and a red arrow pointing towards it from the text above. To the right of the search bar are buttons for 'Download CSV', 'Actions', and a prominent orange 'Create budget report' button. Below the search bar is a table with one row, containing columns for 'Report name', 'Frequency', 'Budgets included', and 'Recipient(s)'. The row shows a report named 'MyReport' with a frequency of 'Daily', one budget included, and one recipient. There are checkboxes next to each column header and the report row.

<input type="checkbox"/>	Report name	Frequency	Budgets included	Recipient(s)
<input type="checkbox"/>	MyReport	Daily	1	1

AWS Budget Reports serve as a more convenient way of staying on top of reports since they are delivered to your email instead of logging into the AWS Management Console

AWS Cost and Usage Reports (CUR)

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

Generate a **detailed spreadsheet**, enabling you to **better analyze and understand your AWS costs**

choose the granularity of your data by selecting hourly, daily or monthly

The report will contain Cost Allocation Tags

CUR data is stored in a CSV (GZIP) or Parquet format in your selected S3 bucket

Places the reports into S3

Use Athena to turn the report into a queryable database

Use QuickSight to visualize your billing data as graphs

Cost Allocation Tags

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

Cost Allocation Tags are optional metadata that can be attached to AWS resource so when you generate out a Cost and Usage Report you can use that data to better analyze your data.

There are **two types** of tags:

- User-Defined
 - Eg Project
- AWS Generated
 - E.g. aws:createdBy

You have to **activate** the tags you want to show up in the report

Cost allocation tags Info

User-defined cost allocation tags AWS-generated cost allocation tags

AWS-generated cost allocation tags (17) Info

Tag key	Status
<input type="checkbox"/> aws:createdBy	<input checked="" type="checkbox"/> Active
<input type="checkbox"/> aws:cloudformation:stack-name	<input type="checkbox"/> Inactive
<input type="checkbox"/> aws:ec2launchtemplate:id	<input type="checkbox"/> Inactive

Undo Deactivate Activate

Search for a tag key All statuses < 1 > @

Billing Alerts/Alarms

Cheat sheets, Practice Exams and Flash cards www.exampro.co/clf-c01

You can create your own Alarms in CloudWatch Alarms to monitor spend. They are commonly called "Billing Alarms"

You first need to turn on **Billing Alerts**

Cost Management Preferences

Receive Free Tier Usage Alerts
Turn on this feature to receive email alerts when your AWS service usage exceeds the free tier limit.

Receive Billing Alerts
Turn on this feature to monitor your AWS usage charges and recurring bills. You will receive email notifications when your charges reach a specified threshold.

Email Address: andrew@exampro.co

Specify metric and conditions

Metric

Graph
This alarm will trigger when the blue line goes above the red line for 1 datapoints within 6 hours.

No unit

EstimatedCharges

Namespace: AWS/Billing

Metric name: EstimatedCharges

Currency: USD

Statistic: Q, Maximum

Period: 6 hours

1921 1923 1925

340
320
300
280

Go create a CloudWatch Alarm and you can choose Billing as your Metric

Billing

259

Billing Alarms are much more flexible than AWS Budgets and ideal for more complex use-cases for monitoring spend and usage

AWS Cost Explorer

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

AWS Cost Explorer lets you visualize, understand, and manage your AWS costs and usage over time.

Specific type range and aggregation

Robust filtering

Default reports help you gain insight into your cost drivers and usage trends.

The screenshot shows the 'Reports' menu with several options listed: 'Cost and Usage Reports', 'Monthly costs by service', 'Monthly costs by linked account', 'Monthly EC2 running hours costs and usage', 'Daily costs', 'AWS Marketplace', 'Reservation Reports', 'RI Utilization', and 'RI Coverage'. Red arrows point from the text 'Default reports help you gain insight into your cost drivers and usage trends.' to the 'Cost and Usage Reports' and 'Monthly costs by service' items.

Use forecasting to get an idea of future costs

The screenshot shows a summary box for 'Forecasted month end costs'. It displays '\$456.94' in large bold text, a downward arrow indicating a '1% Over last month', and a small calendar icon. Red arrows point from the text 'Use forecasting to get an idea of future costs' to the '\$456.94' value and the 'Over last month' text.

AWS Cost Explorer

Cheat sheets, Practice Exams and Flash cards www.exampro.co/clf-c01

Choose if you want to view your data at a
monthly or daily level of granularity

Use **filter** and **grouping** functionalities to dig even deeper into your data!

 Cost Explorer shows up in **US-East-1**

AWS Pricing API

Cheat sheets, Practice Exams and Flash cards  www.exampro.co/clf-c01

With AWS you can programmatically access pricing information to get the latest price offering for services.

There are two versions of this API:

- Query API – The Pricing Service API via **JSON**
 - <https://api.pricing.us-east-1.amazonaws.com>
- Batch API – The Price List API via **HTML**
 - <https://pricing.us-east-1.amazonaws.com/offers/v1.0/aws/index.json>

You can also subscribe to Amazon Simple Notification Service (Amazon SNS) notifications to get alerts when prices for the services change.

AWS prices change periodically, such as when AWS cuts prices, when new instance types are launched, or when new services are introduced
